

BI FLSensor is used for continuous measuring of fuel level in stationary containers or moving object's

- Removable sensor head
- Cropping ability up to 100 mm
- User friendly configuration and calibration software
- Maximum length 1500 mm
- Remote sensor control through the GPS-tracker BITREK
- 1% measurement error
- IP67 protection
- RS-485 Interface
- Standard length 750 mm

Built-in galvanic
isolation

Built-in temperature
sensor

Built-in reverse polarity
protection
